## Statement on Asbestos

Asbestos is a set of six naturally occurring silicate minerals. Because of its unique characteristics, it was often used as a construction material in versatile applications.

However, all types of asbestos fibers are known to cause serious health hazards in humans. Therefore, asbestos is now banned in most countries.

Endress+Hauser doesn't use any asbestos in any of their products and hence we can assure you that all our products are free of asbestos.

Endress+Hauser believes that the information it provides above is accurate. The provided information is based on data obtained from ongoing due diligence concerning goods and materials provided by third party suppliers. Endress+Hauser provides such information "AS IS", without any express or implied warranty of any kind. Endress+Hauser reserves the right to update and modify this communication, as it believes necessary or appropriate.
